

AGRO-INDUSTRIAL EQUIPMENT AND VEHICLES

CFMOTO

We work closely with farmers and workers in the agricultural industry with the aim of providing them the best units and equipment to facilitate their daily work, in all fields. All our machines are prototypes tested in the same fields in which they will work. Both ATVs and UTVs are created to make small, medium and high scale farming easy and convenient. The use of small and light vehicles means that you can work in any weather, no matter the season, and you can get to hard-to-reach destinations. The lighter weight of the equipment facilitates work on all types of terrain, while avoiding damage caused by heavy agricultural machinery such as tractors. The use of ATVs and UTVs for agriculture is a much better and more profitable option.

UFORCE 600

CFMOTO UFORCE 600

is a "monster" designed and equipped with top components to face any challenge. This powerful side-by-side comes with a liquid-cooled engine with electronic injection and a robust chassis, being able to conquer any type of terrain.

UFORCE 600 is equipped with independent suspension on each wheel to equalize all imperfections without losing control for a second. The steering is electronically assisted to provide a smooth and very comfortable riding sensation, even in very tight curves. It offers 41 HP and 49 Nm of torque. The payload is 210 kg, which means you can trust it for daily chores and it has quite an accessible price.

This utility vehicle comes with a standard winch 2500 lbs and LED lights. The latest CVT transmission allows 4x2 / 4x4 modes, which helps you cross any type of terrain, no matter how difficult.

Off-road Performance

UFORCE is ready to tackle the most difficult terrains, with its long suspension and excellent shock absorption. Both the front suspension and the rear suspension have independent actuation, so the passenger and the rider benefit from increased comfort.

Load capacity

The folding bed offers a capacity of 308 liters and 210 kg and can be used to store tools or camping equipment. UFORCE 600 has a towing capacity of approximately 1000 kg and is equipped with a 2500 lbs winch.

CFMOTO UFORCE 1000

If you want a high-performance vehicle, look no further than UFORCE 1000. This side-by-side combines the off-road qualities of an ATV with the agility and handling of a SXS. Also, UFORCE 1000 is known as a potent competitor in its class. Furthermore, it is available at a very tempting price, including the accessories.

UFORCE 1000 has a V-twin engine that generates 79 HP and allows a payload of 500 kg on the platform or towing up to 1700 kg. In terms of suspension, IRS technology was created especially to help with the transport of heavy loads and to optimize the ride on steep terrain without compromising the control. The EPS provides a smooth ride and guarantees full control of the vehicle.

UFORCE 1000

POWER

UFORCE 1000 has a liquid-cooled engine, 1000cc V-Twin that allows the rider to succeed in different types of applications, in all areas (farms, agriculture, industrial platforms etc.).

SAFETY

LED lighting with last generation technology and low consumption allows complete visibility even in dark environments. It comes equipped with comfortable, ergonomic seats and 3-point safety belts to ensure a safe journey.

TILTING BED

Due to its width, the tilt bed is practical. Also, it is perfectly complemented by a robust pneumatic arm that allows the easy unloading of any type of load.

CFMOTO UFORCE 1000 XL

As the name suggests, UFORCE 1000 XL not only offers excellent towing/carrying capabilities, but also offers users a robust product with excellent handling performance and a comfortable riding experience.

UFORCE 1000XL, based on UFORCE 1000 platform, represents the latest six-seater UTV from CFMOTO. This model has multiple upgrades in terms of motorization. Thanks to the powerful and reliable V-Twin 963cc engine, it delivers excellent traction and carrying capacity. Moreover, the rider benefits from greater power and a smooth driving operation which is supplied by ride-by-wire throttle. The CVT gearbox guarantees maximum traction and smooth acceleration.

UFORCE 1000XL

STRONG ENGINE

Thanks to the high quality engineering and design, the vehicle is able to tow up to 1133 kg (2500 lbs). It is more powerful than other similar models

SAFETY

12 inch aluminum rims and 27 inch tires ensure a minimum ground clearance of 280 mm. This means you can ride even on muddy terrains.

STANDARD ACCESSORIES

UFORCE 1000XL is equipped with a large fuel tank 40 liters, LED lighting system, multifunctional dashboard with 5 inch TFT screen, winch (front) 3500 lbs with remote control and gas shock absorbers.

Agricultural Accessories

IRON^{BALTIC}

■ Hay bale trailer

ATV & UTV bale trailer is a simple yet durable trailer for transporting hay balls. The bale trailer is easy to use and maneuver. Thus is the ideal tool for smaller jobs around the property or for moving hay in stables or animal farms between fields, storage, living and feeding areas. The bale is loaded by backing the trailer to the roll, lowering the spikes with the help of the manual winch, backing the trailer spikes into the roll and using the winch again to lift the bale. Unloading is just as simple and only requires lowering the bale with the winch and driving away.

The 600 kg / 1322 lb load capacity trailer attached to an ATV does no notable damage to the terrain and is easily maneuverable between trees, over ditches, through narrow or low doorways and in tight indoor spaces allowing access to places outside the reach of larger rigs.

Features:

- Strong steel frame structure
- Galvanized and powder coated surfaces
- Fast and easy loading and unloading
- Stable on uneven ground
- Manual winch for loading and unloading the bale
- A load capacity of 600 kg / 1322.77 lb.
- Equipped with a 50 mm / 2" hitch coupler

■ Silo bale trailer

Silo and hay bale trailer for transporting rolled silage and hay. Strong construction, tandem axle and wide terrain tires ensure a large load capacity and good terrain passage to allow for fast transportation of bales to barns, stables or feeding areas. Loading of the silage bales can be done with the assistance of lifting grips and raised with an electric winch.

The bale trailer is designed for ATVs and UTVs but can be towed with any other vehicle equipped with a 50 mm / 2" hitch ball. The 1000 kg / 2204 lb load capacity trailer attached to an ATV does no notable damage to the terrain and is easily maneuverable between trees, over ditches, through narrow or low doorways and in tight indoor spaces allowing access to places outside the re

Features:

- Strong steel structure
- Load capacity 1000 kg
- Maximum bale diameter 1500 mm
- Off-road tires 22x12-8"
- Loading / unloading bales with electric winch via remote control
- 360° swivel hitch coupler
- Tandem axle with four wheels.

■ Leaf vacuum trailer

Leaf vacuum trailer is to be used for clearing the streets, yards, parks or fields from fallen leaves or collecting cut grass, garbage/litter etc. It is a quick and easy way to clean larger areas by collecting the fallen leaves or cut grass into a trailer cargo box and transport the load to a suitable place to empty by tilting the cargo box.

The kit consists of the Iron Baltic Basic 500 cargo trailer and the leaf vacuum attachment fitted to it. Quick and easy installation and removal of the vacuum attachment to and from the trailer, so the trailer can also be used as normal cargo trailer during offseason when the vacuum attachment (consists of vacuum unit, trailer cargo box extensions and the PVC cover, towbar and the support wheel) is taken off. 6 horse power Briggs & Stratton engine runs the wear-resistant Hardox 400 steel 4-blade turbine impeller reaching the 70 m³/h flow capability. The product comes with a 3.5 meter long flexible, oil and bio-acid resistant, 180mm diameter suction tube.

Features:

- Easy to fit on or remove the attachment from the trailer
- Flexible suction tube with 180 mm diameter and 3500 mm length
- Light and easy to use hand nozzle, with a wheel
- Durable PVC cover for trailer
- Complete user guide & safety instructions included.

■ Graver / Scraper ATV-UTV

ATV & UTV road graders / scrapers are simple, durable and easy to use graders meant for road improvement works or land planning. The graders are designed for ATVs and UTVs but can also be towed with a small tractor or any other vehicle equipped with a 50 mm / 2" hitch ball.

In order to improve performance in tough terrain, ATV & UTV road graders / scrapers are equipped with a frame for adding extra weights. The standard double-sided blade means the blade can be flipped and used again once one side has worn down. An optional Hardox 400 steel blade is available for more difficult conditions where extra durability is required.

The road graders / scrapers come standard with manually adjustable wheel height to lift and lower the blade. Two different versions of powered actuators and an adjustable tow beam are available optionally. These combinations allow the height of the blade to be adjusted from the driver's seat making work faster and more convenient.

Features:

Easy to install

Solid steel structure

Dimensions: 1950mm x 1780mm x 720mm

Weight: 85 kg

Tyres: 4.80/4.00-8.

■ Leveler

Iron Baltic levelers are simple, easy to attach and use tools for ATVs, UTVs and garden or lawn tractors. The levelers are suited for preparing and covering seed beds and lawns before and after planting and are also ideal for leveling dirt or gravel, seeding food plots, preparing for sod, or even dragging ball fields.

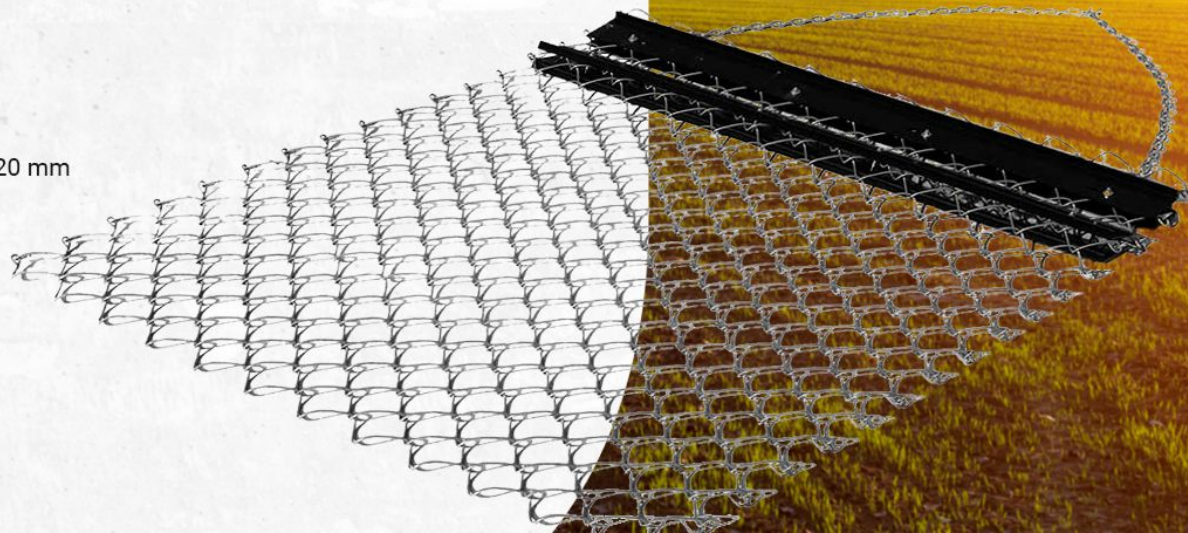

Features:

Dimensions length - width - height: L 1500 mm x W 1200 mm x H 20 mm

Low weight: 20 kg

Powder coated steel framing and galvanized mesh

■ Heavy Duty Drag Harrow

The drag harrow is easy to attach for ATVs, UTVs and garden or lawn tractors and can be used to cultivate and prepare seed beds or used for raking up dead forage.

Features:

Dimensions: L 1200 mm x W 1200 mm x H 100 mm

Low weight: 48.5 kg

Powder coated steel of 12 mm thickness.

■ Disc Harrow - Flip Over disc

The 50 mm / 2" hitch ball allows using different ATVs, UTVs and small tractors.

With added weights (like sand bags), the flip over disc mounted on an ATV can also be used for grinding up dried vegetation for fallows. The flip over disc's simple design means it can be easily changed from the transport position to working position by simply flipping it over.

The flip over disc attached to an ATV is capable enough for small and medium scale farming and is recommended for commercial food plot farms, large gardens, row cultivation, and yard prep work.

Features:

Working width: 1200 mm
Working depth: 100-150 mm
Disc diameter: 460 mm
Cutting angle: 20 degrees
Weight: 165 kg.

■ Quadivator Landscape Rake

Quadivator UTV landscape rake is a heavy-duty rake designed for UTVs, but can also be used with heavier and more powerful ATVs (800cc and up), small tractors or in combination with any other vehicle equipped with a 50 mm / 2" hitch ball.

The landscape rake is suitable for landscaping residential and commercial lots, leveling driveways and parking lots, maintaining riding grounds and animal enclosures and also for smaller jobs, which require a compact and light weight solution. The working angle and height of the landscape rake is easily adjustable allowing it to be used on various terrain. The landscape rake attached to an UTV is capable enough for small and medium scale jobs making work simple and fast.

Features:

Heavy duty steel frame structure

Working width: 1800 mm

Tine height: 380 mm

Dimensions: 2200 mm x 1800 mm x 700 mm

Weight: 110 kg.
